Exchange drawings more easily: Get notified when someone saves a copy of your drawing on their system. Also, now you can share your drawing and embed it into an e-mail with a click of a button, and have it automatically open in the recipient's AutoCAD. Work with more detail: Add details to the objects in your drawing, such as holes or door and window openings. Use the annotation tool to add special annotations like "Hole: 2", "Opening: Bottom Left" or "Heading: South." Save time creating stencils: Make it easy to create custom stencils using the new Edit Mesh tool. Make it easier to share and manage custom components: Use the new Components tab to create a template of all the custom components in a drawing. Save time when creating a similar drawing later. Use existing templates as a starting point for new projects: With templates, you can create a new project with an existing template, similar to making a copy of a drawing in AutoCAD. Create powerful navigation and insert tools: Work with the same tools and commands no matter how you create the objects in a drawing. Get the most out of AutoCAD with the new Visualize application: Work with a variety of cross-platform software more seamlessly by creating a single set of work files. Get more out of AutoCAD by updating: Maximize the performance of AutoCAD and see more of the drawing area and objects on screen.
