High-quality graphics blur the line between game and reality. 4,000 polygons per vehicle provide exceptional detail, right down to the disc brakes in the rear... and even the glitter on the windshield. As for the gameplay, it doesn't differ much from what we've seen before. The game puts you in control of several types of vehicles with some rather specific features such as the ability to take control of your own tank. But you can't use them all at the same time as you have to drive each car separately.
