A useful tool for everyone who has a PC. The application provides you with an easy radio player with which you can listen to the stations of your choice. It runs in the system tray in the background and automatically displays the current song title in a small notification window. The functionality of the application is easy to use: - Open the station radio you want to listen to - Start the radio - View the information of the current song - Post the song to the most common online sites - View the song on YouTube - Post the song to Twitter - Copy the title of the song to the clipboard - Click to record the song and add it to the library - Click the moment of the song to see more

information and view the song on YouTube. - Enable / Disable the program to the system tray - Show or hide the notification window that displays the current song title - Enable / Disable the song pause functionality - Configure the notification window that displays the current song title - Define the current song title to be displayed in the notification window - Select the window size for the notification window that displays the current song title - Enable / Disable the "On Startup" function - Play / Pause the radio - Enable / Disable the "Show Icon" function - Maximum options that the program permits

Requirements: This program is compatible with computers running windows vista (version 600) or higher.

The minimum platform supported by the program is 64 bits. You will find an icon for the program installed in the following locations: - If you have installed it to your desktop, it will be in this location: C:/Program Files (x86)/RadioKaras - If you have installed it to your Program Files, it will be in this location: C:/Program Files - If you have installed it to your application directory, it will be in this location: W:/RadioKaras You will find an uninstaller in the following location: C:/Program Files (x86)/RadioKaras/Uninstall.exe We encourage you to make use of the feedback facility for the program. We would love to hear from you. Stopping Internet Radio streams You might want to stop internet radio streams. The most

popular solution for this problem is probably the "ClickOnce" installation, which will add a tile to your Start Menu and will then start the installation process. A cool little tool to do this is called a "Tiv

What's New In RadioKaras?

----- RadioKaras is a handy and easy to use application designed to provide you with a simple radio player for your PC. The application enables you to listen to the following online radio stations: sky.fm, DI.fm, RockRadio.com and JazzRadio.com. It runs in the system tray and automatically displays the current song title in a small notification window, enabling you to copy its title, search it on

YouTube or post a message on Twitter.

Key Features: ----- * Listen to online radio stations: sky.fm, DI.fm, RockRadio.com and JazzRadio.com. * Automatic updates: A new version of the application is available as soon as it is published. * Playlist: Play/Pause/Stop a song and play from a pre-defined list. * Status (Internet connection and network traffic): Track the status of your Internet connection and the current download rate. * Title details and updates (Lyrics): Get detailed information about the song and its lyrics. * Background audio (WMP, XM, Winamp and Flash audio): Stream audio from various internet sources, such as Winamp, XM, Winamp, Flash audio, etc. * Rate the songs: Rate the songs according to their progress or

the position of the current song. * Status bar: Contains the date, time and music volume. * Tag editor: Add tags to your songs. * History: Store your played songs to a history list. * Restart music or radio: Restart music or radio stations. * Share via social networks: Copy the current playing song to your clipboard. * Copy the current playing song to the web: Copy the current playing song to the clipboard or to the web. * Online status, Info, web: Check the status of the internet and your connection. * A notification box: Shows a small window containing the current song title. * Music library: Store and play songs from your hard disk. * Status window: See the current status of your internet connection and server. * Check your connection and

download speed in a real-time basis. * A status bar: See the current downloaded song, remaining song and track number, date and time. * A help window: View the help pages. * A toast: Show a small message on the display area when a song ends. * A link to the version history: See all previous versions of the software

System Requirements:

Genuine Windows XP with at least Windows XP SP2 (v200) operating system. A minimum of 256 MB of RAM. Properly configured graphics card for DirectX 9 capable hardware. Compatible video card and sound card. The combination of a mouse and keyboard is recommended but not absolutely necessary. A CD or DVD drive. If you are using an ADSL modem/router, ensure that you have an ADSL connection in your local area. A 56 kbps modem is
