KeyMacro is a tool to help you press faster. In most cases it's

---

very easy to press wrong keys or to press the keys twice by mistake. KeyMacro could help you prevent this problem by letting you choose the keyboard shortcuts you want to use. By default KeyMacro checks the keyboard shortcuts for every other installed application (except KeyMacro itself). If it finds any problems the shortcut

---

is colored in yellow (for example) and the problem is displayed in the list.

## KEYMACRO GUI Description:

KeyMacro GUI is a small application that helps you to have a better overview of the shortcuts that are currently checked by KeyMacro. You can edit the shortcuts by clicking on the shortcut icons. You can also

---

check the shortcuts of an application by clicking on its icon. You can change the keyboard shortcuts when running KeyMacro.

## AUTOMATIC TTS

for sealants, and particularly non-aqueous acrylics, in dental procedures has increased significantly in recent years. For example, the formation of a sealant between the base of the restoration and the cavity preparation is essential for a successful restorative procedure. Some sealants, however, exhibit poor adhesion

---

to dental tissue and poor handling properties, particularly during bonding procedures. These problems are accentuated when the cavity preparation includes dentin. For example, when the sealant is applied directly to dentin, the sealant may readily exfoliate from the preparation and other problems can occur such as excess bond
