AutoCAD Architecture AutoCAD Architecture is a family of software tools that create virtual building models (vitamins) and can convert them into real houses. The software also has a range of commands to import 3D models, convert them to 2D drawings, and design within the software. AutoCAD Architecture was created by DEGUS Corporation, which is a subsidiary of DFX, Inc. of Dallas, Texas. DEGUS is a commercial division of DFX, Inc. under contract to Autodesk. DEGUS was sold to DFX, Inc. in May 2011. Autodesk acquired DEGUS in 2011. DEGUS received the U.S. Environmental Protection Agency's ENERGY STAR® Partner of the Year Award in 2005 for its efforts to promote energy efficiency through its AutoCAD Architecture software product. AutoCAD Architecture (formerly known as ArchitectureDirect) is part of the Autodesk Architectural Product Suite (AutoArch). As of May 2012, AutoCAD Architecture was officially renamed to AutoCAD Architecture, AutoCAD Architectural Products, and AutoCAD Architectural Products (all three abbreviated "AutoCAD Architecture"). AutoCAD Architecture is available as a cloud service and on-premise. AutoCAD Electrical AutoCAD Electrical is a design automation software product from Autodesk for electrical, plumbing and other civil engineering projects. The product can be used for designing any structure, and is primarily used by electrical contractors and engineers. AutoCAD Electrical is the successor of Revit Electrical. AutoCAD Electrical is available in both cloud-based and on-premise versions. AutoCAD Electrical is available as a cloud service or as a license for on-premise installation. AutoCAD Electrical was designed to work with Autodesk Construction Manager, Autodesk BuildingSMART, and Autodesk ProjectWise. AutoCAD Architecture and AutoCAD Electrical are components of Autodesk Architectural Product Suite (AutoArch), which was renamed as Architectural Product Suite (Aps). The AutoCAD Electrical suite is based on the .NET platform. A multi-year collaboration with Microsoft and Intelio leads to the development of an integrated solution for design, construction, and asset management in which the engineering, technical and construction process are automated using the AutoCAD family of products.
