#### What's New In?

Redo Backup and Recovery is a powerful and easy-to-use disaster recovery solution that offers a real-time alternative to CDs or USB sticks. Applying an intuitive and user-friendly approach, the software helps you to quickly and easily back up your personal data to CDs, USB flash drives, external drives, and even remote servers on your network. Just copy your files and folders, add them to the backup session, and provide the needed information - such as a label, a description, and a backup date and time - then click on "Start" and all your data will be backed up in a matter of seconds. The recovery process is even easier. Simply choose the appropriate session, pick the desired files or folders and click on "Run". Then, you will be prompted with a confirmation message that you can safely delete all the files from the CD or flash drive. Also, Redo Backup and Recovery gives you the option of starting a computer recovery in the event of system failure. The process is similar, yet very different to those used by other reliable backup applications. To perform a recovery, simply select the "Recovery" option, then click on the "Start" button and select the bootable CD or USB drive where you have stored your OS.
