Release history The official forum thread for Vivid WorkShopData ATI is here. Added in version 12.1. Improved engine startup to prevent potential hang-up or repair issues. Changed the hot-plug behavior of the engine such that extended, repeated hot-plugs now bypass the engine start. The process of disabling hot-plug bypass is now the same as in previous releases. Added the new "Rename Sessions" command to the Session Manager window. Use this to rename a session, or to remove a session if it is inactive. Added the ability to set the default internet browser for other programs that support the "open in default internet browser" protocol such as VLC, XBMC, etc. Added a new tab option to the Settings dialog, allowing the user to assign a default tab label in the web browser configuration screen. Added a new registry 3da54e8ca3
