What's New in the?

I. About the program All4Bay is the seller's tool to automate the after sales processes. Products, orders and customers are entered easily. After an order is processed All4Bay then either processes the order manually or lets the user choose between manual processing and online processing. To simplify and speed up the manual processing All4Bay assigns an optimal assistant. The product information is stored in the product form. The customer information can be also entered via the data bank of eBay. All4Bay also shows the current status of each item. Every item can be attached to a

buyer account. This way a buyer has his own seller id. To track and assign an agent to an item, the program contains a modules for the following agent management: ** No users = no processing time with manual processing ** One user = 6 minutes with manual processing ** Two users = 30 minutes with manual processing ** Three users = 3 hours with manual processing ** Four or more users = 24 hours with manual processing ** No users = N/A with online processing The detailed status of the item after processing is shown in the order information. The program can automatically tell who is most likely the agent for an item and assign an agent to this item. II. About the program user All4Bay is a professional seller tool. This program is designed with a) Sellers in the main focus and not buyers; b) Shop sellers in mind, by realizing that they are not in the business of buying, they are in the business of selling. So the main user perspective is the seller. With regard to the buyer perspective the program takes into account that buyers follow the same rules as sellers. All4Bay is for all shops: small and medium sized (with a small team of employees) shop sellers can use this program. All4Bay development was inspired by many private business cases. eBay shop sellers are small and medium sized business. So we were very careful that All4Bay should be suitable for them. All4Bay User Interface All4Bay is designed in such a way that it does not take over the user interface from eBay. So there is no need to switch to a different eBay user interface like the normal product search can be done in All4Bay. When an order is made in All4Bay the order number will be used to find out this order from your eBay account. All4Bay is designed in such a way that the seller can change the screen size he

System Requirements:

PowerPC - Compatible PowerMacs, such as the G3 and G4 from Apple. These machines all require a Power Macintosh 7200/600 MHz CPU. Mac OS X - MAC OS X 10.5.5 (The current version of Mac OS X) is required in order to run the game. 30.0 Megabit Internet Access Access to the Internet must be at least 30.0 Megabits per second.
