Multi-user architecture drawing AutoCAD offers multi-user architecture drawing (mixed-use application) for architectural and engineering design professionals. It offers multi-level security, with sub-users and groups, and templates for common tasks. Drawings can be shared with or assigned to users, so that a user may modify and update other users' drawings. This means that users can draw in different documents at the same time. AutoCAD 2010 and later versions have introduced:

- Fixed Width and Fixed Height layout
- Changes in sub-user security based on Active Directory roles
- Multi-language support
- Support for legacy databases (such as dBase)
- Direct file transfer
- Enhanced user interface, such as improved keyboard commands, drag-and-drop, and context-sensitive help
- Integration of content sharing with Autodesk® Inventor® and Autodesk® Inventor® Web Note

Web Note: Only AutoCAD 2010, 2013 and 2015 can open Microsoft® Word documents natively. AutoCAD 2009 and Auto

A survey in 2013 estimated that there were 7,000 companies using AutoCAD. A survey in 2019 shows AutoCAD has less than 1% market share in the industry, while Trimble has about

57% and Microstation about 14%. AutoCAD is used by more than 5,000,000 users in more than 100 countries, and AutoCAD 2010 alone has more than 500,000 registered users. Development AutoCAD 2000 and AutoCAD LT AutoCAD was created in 1987 by John Walker of Bentley Systems.
