Microsoft Windows applications using AutoCAD's.NET and Component Object Model (COM) frameworks, called ASP.NET drawing services and XPS Document Drawing Services, respectively, as well as support for the Adobe Acrobat PDF file format, allowing digital drawings to be edited as documents rather than drawings. AutoCAD has support for Windows Communication Foundation (WCF) and ADO.NET to support database and XML-based drawing information, such as XML Paper Specification (XPS), as well as a RESTful Web Services API. Some CAD programs support their own scripting languages, which are complementary to the aforementioned systems. Some of them are: AutoLISP Visual LISP Visual BASIC for Applications Microsoft Visual Basic Scripting Edition (VSSE) Easily created scripts can be saved as a stand-alone executable or imported into applications with the AutoCAD Direct Source option. Third-party add-on products have been created to work with AutoCAD. These include visual programming tools that work in conjunction with Visual LISP, a scripting language often used by CAD industry for scripting AutoCAD drawings. Extensions AutoCAD's user interface has been the target of many creative extensions to change the program's appearance, functionality and use. Many of these are officially released in the application's Extension Manager. Some of the more notable extensions are: VectorWorks Interactive Drawing (released in 1996) Inventor Vizio (2006) Autodesk Subscription (2008) BIM 360 viewer (2010) SmartDraw (2011) Arx 3D (2011) DraftSight (2011) Visual LISP (released with AutoCAD 2009) Microsoft XPS Viewer (released with AutoCAD 2010) Q2CAD (2011) SolidWorks Viewer (2011) Visual Director (2011) Video-on-demand In addition to its use in working on CAD models, AutoCAD is sometimes used in production of live training and training videos, such as a company-specific training course on how to use AutoCAD Architecture 2010.
