Markup Import features new collaboration capabilities that simplify integration into your projects and designs, and enable you to leverage feedback without requiring additional review time. With these new capabilities, you can import and use feedback more efficiently and accurately. Create a single, collaborative report that addresses multiple issues, or create and customize a detailed report for each issue. Receive live update notifications when someone makes changes to the feedback, and view the reports in one place from your desktop or mobile device. Download collaborative feedback reports that include a table of contents for easy navigation of the report. Rapidly prepare and review feedback. Instantaneously see an issue's description, as well as the change and image details. Invite reviewers to add or update their comments, and allow team members to view and update comments to drive collaboration and consensus. CAD 2D: Bracketing: Bracketing lets you edit, modify, and edit again, creating a new, higher-quality, and more accurate draft. Every time you open a drawing for edits, CAD 2D automatically creates a new, blank drawing area and prompts you to close the previous drawing. You can change the size of the new drawing area. (video: 1:55 min.) Users can also bracket directly in the Drawing view with the existing Drafting Tools. This allows users to seamlessly create multiple sets of drawings in one drawing. This new capability is fully integrated into the existing Drafting Tools and can be used as an extension to the existing tools. CAD 2D also offers an easy way to switch between 2D drafts and 3D models. You can switch between 2D drafts and 3D models using the new "Model in 3D" and "Drafting in 2D" Drafting Views, which are accessed from the View toolbar. (video: 2:18 min.) Two new Drafting Views in the Drawing toolbar (2D and Model in 3D). Create Drafting Views: With this new capability, you can create new Drafting Views to use specific Drafting Tools and run custom commands in the tool. (video: 2:08 min.) Quickly access Drafting Views: You can easily access the existing Drafting Views or create new Drafting Views directly from the Drawing toolbar, from the Drafting dialog, or through the context menu in the status bar.
