Who We are: We are a team of IT professionals working with the motto to offer the best Software solutions. After years of struggling with the problems that we can fix. We decided to join our skills with the world of Software development and finally the world of Software development. See Everything You Missed During The Ultra Music Festival Lineup Reveal

The biggest annual music festival in North America — Ultra Music Festival, now in its 20th year — is still throwing new names at us each year, and the lineup is now in full swing. The event will take place this weekend, August 24-28 at Bayfront Park in Miami. The acts of this year's lineup include a wide variety of names, from the 21st century to the past decade, but one name stands out above the rest: Pharrell Williams. The Grammy-winning producer and songwriter will return for his first-ever U.S. appearance at Ultra. Dede Gardner, general manager for Ultra — which takes place on the very same weekend as the Billboard Latin Music Awards — says Pharrell's presence in the lineup is no coincidence. "As a huge fan of Pharrell, we knew that he would be a great fit for our lineup this year and you're seeing all of the artists that he's influenced take place in the lineup as well." Williams, 38, has had a lasting influence on the music industry since his unforgettable work with Gwen Stefani on "Hollaback Girl." He has had big hits with fellow Top 40 acts like Nelly, DMX, Eminem, Rihanna, and Mya. This year, he is working on a new album that he says has a "festival" feel to it. If you're not familiar with Pharrell, you've probably heard some of his music. He even has his own theme music, which you can hear below. Check out the full list of performers at Ultra Music Festival below and see all the details at the festival's website. Q: Minimal warmup / actuals I'm planning on using warmup and actuals for weightlifting. However for my particular exercise, I want to be able to repeat max attempts in the most efficient manner possible. What would be a way to do this? For example, let's say my first warmup is "50x" and I want to go from there to my max. I would do 50 of the 50-
