What began as a dream of a girl in a small Japanese village over a century ago, Snowbell, a Christmas Festival in a winter Wonderland, has become the most famous snowboarding destination in the world. With a location as perfect as it is timeless, Snowbell has become a must-do holiday for everyone, including the three kids who are frozen in time within it. Kirsty Fitzsimmons, Snowbell's new resident naturalist, has finally arrived to see the site, and is tasked with documenting everything in the way of its history and natural beauty. With the help of the other kids, she uncovers the site's first inhabitants; a set of strange, pocket-sized creatures whose tattered clothes and mysterious yet endearing behaviour remains a mystery to everyone. But before they can be rescued, their magical powers have vanished, leaving them stranded in Snowbell without magic, and unable to communicate with others. Together with Kirsty and the children, they must travel across the site in search of a way home and the mysterious Winter Tree. But even their sleigh can't keep up with the cursed tree's speed and the children soon find themselves far from home... with no home to go to.
