Hero of Not Our Time is a narrative-driven, free-roaming game about the horrors of war, the moral ambiguity of systems, and the quest for freedom, even at the cost of your soul. You have a gun. Use it. Use the interface in-game to search for weapons, ammo, and equipment to help you get by the warzone you find yourself in. A handy system ensures that when the screen goes dark, you'll know exactly what you need to acquire to make it through the next day alive. The world of Hero of Not Our Time is out of your control, but your skills are only as strong as the weapons you can find, use, and craft for yourself. Modding The game is fully moddable. Pick up the crafting station in the leftmost corner of the garage and begin crafting your weapons from the kits available in the crates throughout the game. Realism Realistic-looking weapons are attainable, allowing you to acquire the strength needed to repel off the hordes of brutal, and sometimes-razor-sharp, soldiers your fellow civilians struggle to survive in. Hero of Not Our Time has a lot of features that you will never see in other games. That's because Hero of Not Our Time is a first-person shooter that drops you into the deepest of nightmares. No Safe Places Hero of Not Our Time has no sanctuaries. You are free to explore the battlefield, encountering anything and everything that lies in your path. Unprotected Buildings You are free to enter and explore any building in the game, whether its on the tarmac, or in a small town. There are no set walls that keep you out, and your life is put at risk at every step you take. Unfriendly Citizens Anyone that you meet in Hero of Not Our Time is trying to survive, and many are victims of the chaos you have brought to them. As a rule, you shouldn't be trusting people in a war zone. That said, it pays to be careful. System Combat in Hero of Not Our Time is quite hard to comprehend, so it is best to just have an in-depth look at the system. Defense Every enemy that you get is capable of hitting you, and the simple act of shielding yourself while dealing a steady volley of bullets can trigger a round end on any enemy. The trick is to become difficult to hit by the time you get down to the last few rounds in your clip

Sendai, a city in Japan severely hit by an earthquake and tsunami in March 2011, is being dramatically rebuilt using a mix of traditional Japanese, organic materials and green technology. An unconventional symphony has emerged from the disaster-ravaged city, made up of musicians across the globe who have been lured to the famous Fukushima Daichi nuclear power plant to record a specially-composed 'Battle of the Giants' soundtrack to commemorate the disaster. The resulting album is named Hero of Not Our Time after the Haitian proverb that says "The bad and the good die but their names live on". The album was recorded in the heartland of Japan's industrial might, at Shinkansen manufacturing plant.
