Since the first translation of Homer’s Odyssey was adapted in the seventh century B.C., humans have taken great pleasure in chronicling the stories they encounter. The Odyssey was born as an oral tradition and its first written form was also a narration of events, myth or legendary. The Odyssey describes the story of Odysseus, the cyclops’ attack, the shipwreck and, of course, the adventures of Odysseus in search of the Sirens, the island of the Phaeacians, and his return home. On the island of Scheria (Santorini) live the Furies. They are the goddesses of vengeance and of the dead: wrathful, black-winged, bloodthirsty, vengeful. They were mourned by the dead on death, but could not be appeased. In the Odyssey, one of the goddesses accused Odysseus of killing a man in his home, a crime for which he was condemned to spend many years wandering around. The Furies of the Odyssey are sympathetic to the story. A common theme in mythology and in the fantasy literature is the cyclical and recurring stories. Iris is one of the more important goddesses of the ancient Greek mythology. It was also, at one time, a significant deity of the Roman religion. Iris is the messenger of the gods and the only goddess who was born of the Greek Goddess Hera, the great wife of Zeus, as opposed to his other two sisters, Leto and Phoebe. She was sent out from the sky and across the earth to communicate Zeus’ plans and messages. Iris is said to have wings with their two claws on each side. The goddess is usually described as a dove, and was also associated with rainbow. There is a

crucial passage in the Odyssey about the goddess Iris that runs: "she who brings messages to the gods through the deep sky; she who flies through the air and is never still; she who sits by Zeus, highest of the gods" [2 d41b202975

Otherwise, this almost flawless piece of work will take all the attention away from you. —Douglas Johnson Ascetic Editor When this happened on a magazine page earlier this year, I was very surprised by the reaction. I expected it to be the hottest new game coming out of nowhere and self-fulfilled by the end of the month. ## **What's new in My Jigsaw Adventures - A Lost Story:**

The text preceding the pictures is the original narrative, written by Peter in 1982 The Story so far My mother was the only child of a particularly rigid Catholic family. My father was a Royal Engineer and my brother and I were frequently with my grandparents. By way of punishment for these frequent absences I have always had an intense dislike of family life! Consequently with regard to my parents' play equipment, there was little; it had to be extended by whatever recreational scheme they could devise, or they might take us where they thought we might play. If you recall from the very beginning of this narrative, I very much enjoyed long walks (which I

now take almost religiously, and, for the most part, without any really interesting effect) and, on these, there existed a jigsaw puzzle that I had drawn myself. The only other children I remember to have met were in another section of that hospital ward, and that, with a very limited group of other children, of whom one was my friend's (and my brother's) little sister, might, therefore, suggest, at least, a certain amount of harmonious play. On my parents' return to the ward (it was a closed-down hospital) they found this puzzle completed, although the decorative edges of the box (with the purpose of decoration but, from the look of it, needing only removal or cutting away of the patterned paper) had been removed and all the pieces put in a more satisfactory arrangement, on a tray. Together with the puzzle and the two cups of tea they brought back, they also brought a note that stated, "Why have you not finished this puzzle? We found it where you said you left it! It is a beautiful puzzle. We have kept it for you." My mother said that it was finished, but that her husband must know something was missing as it was not in the right place. My father said that it had obviously been put somewhere else after the time he was there, but he did not know, or understand, that anything more than this had been done. I was lying in bed and told my mother that the puzzle was indeed still in its incomplete form, and that was the only thing I could remember. They returned to the hospital (my mother needing attention for a tracheotomy during the previous day, which I think she made unattractive by her general languor) and asked whether I could tell them what had become
