* **Photoshop Elements** is a full-featured version of Photoshop with fewer complex features. It's great for beginners who want to learn Photoshop but don't need its power and flexibility. * **iPhoto** and **iMovie** are Apple products that let you edit images on your computer. You can import photos from your digital camera, or save photos from apps like iPhoto, iMovie, and Pages. # PORTRAIT Portrait is another word for person, and it's the most common format for digital photos. A _portrait_ has a subject facing front and center with a wider composition than a landscape. It is a natural bent toward people, and Apple refers to the process of creating a portrait as "flattening out" the subject. The easiest way to create a portrait is to stick with rectangular image composition. This shape creates a composition that follows the subject most naturally as well as gives the composition something of a straighter, more horizontal feel. It also lends itself to the shorter sizes of a digital camera; only the longest lenses can do a full-length portrait. No

matter what the shape of the composition, a portrait has some basic elements at its center. These include a focal point that attracts attention, a horizon line that defines the composition's edge, and a path that leads the eye to the subject. Because a portrait has a shorter length than a landscape, the background is usually in a limited area, making it easy to include only the subject's face and just enough of the background to bring the face into sharp focus. ## Preparing a Portrait You create a portrait by using the same basic elements that you would use for a landscape, but the subject in a portrait is important to show off and draw attention to. In a portrait, the subject doesn't have to be in the middle of the image—in fact, that's usually a good thing because it keeps the viewer's eyes from wandering all over the photo. Also, though, a portrait needs to have something interesting going on in the background. The more interesting the subject, the more interesting the background, and the more you can control what the viewer sees. Because you can easily crop a portrait after you take a picture, you can add and subtract just about anything into the final composition. On the other hand, you don't need to use the entire image. A small detail of the subject can be interesting enough to fill

Kathleen Lavey Lansing State Journal LANSING - When Carl Homan recently delivered a public apology to the communities he had wronged, he included a passage that shed light on the emotional journey he had traveled since his arrest. "This has been a long and painful process," he wrote. "Many of the people I harmed have never met me. But, I hope, that they can now see the pain and harm that they have caused and make amends for it. And, I hope they can learn from my mistakes and live a good life." The 27-year-old West Bloomfield man's actions, while tragic, were still wrongful, his attorney Gerald F. Nugent told the judge who sentenced Homan this morning. But, Nugent argued, Homan doesn't deserve to spend the rest of his life in prison. "It is not just the behavior that caused the great harm to the victims," he told District Judge Margaret M. Kahren before sentencing Homan to three years in prison for three counts of first-degree criminal sexual conduct. But Homan's actions "stunk" and that might make him more dangerous, Nugent said. "His conduct was bad but not just bad," Nugent said. "This man presents a risk for re-offending." Kahren said she listened to the evidence. "Given the nature of the crimes and the length of time between them, I think he needs more than three years in prison to protect the public from further crimes," she said. She sentenced Homan to three years for the first count of first-degree criminal sexual conduct, and seven to 15 years for each count of second-degree criminal sexual conduct. That combined with a two-year sentence that Homan is already serving in a drug treatment program in Michigan will give him 13 and a half years to serve. Homan testified last week that he attacked four women, but Nugent said that there was no evidence that the attacks occurred.

Nugent said there is no question that the family members of the women were injured and left to deal with the consequences of Homan's crimes. "Without question," he said, "these families are the ones who were injured." Homan's attorney argued to the judge that community support had been huge for his client. He said Homan has a good job and a
