The observation of the world through the eyes of the unknown Eye is known as the Dream. The reason why these people are trapped in the Dream is unknown. The Eye senses danger and terror everywhere, but there are two places in the Dream not affected by the Eyes "Red Light" and "Blue Light." These two people can use their own dreams to see what these two areas are. The one who manages to find the device that allows them to control their dream will be free from the Eye. UNAVUE: You are trapped within the perception of a mysterious Eye; everything it sees is a reality for you. But a curious thing happens when its eye closes, the world disappears around you and anything brightly lit up leaves an afterimage burned into the vision of the Eye. To you, these afterimages are solid objects, and you can jump on them to get to unreachable places and accomplish impossible feats. Use lights to your advantage when the eye is open. Flip switches, rotate lights, carry lanterns to light up the world, and close the eye to create afterimages where you need them to overcome the many puzzles and challenges in this world. Explore hand drawn landscapes and discover ancient technologies while uncovering the secrets behind this strange power. Features: Solve lateral thinking puzzles that use 2D dynamic lights in unexpected ways. Explore underground ruins, ancient towers, floating cities, and more! Meticulously hand drawn levels and animations. Enemies that become part of the puzzle. A somber and peaceful original soundtrack by Ryan Sligh. No box pushing puzzles! The Basilisk

"Arbitrary violence is allowed, and there's more than enough of it. Skyrim only has the occasional, almost disconcerting, death scene, but there's no shortage of ferocious battles and limb-severing shenanigans. Some of the combat feels a little clumsy at first, but I liked that, because I wanted it to. Skyrim is no RPG purist's RPG. Sure, you can unlock some of the story and dialogues and read all the non-interactive sidequests in your leisurely play-through. But the real meat of Skyrim are the side quests and dialogues that you encounter, since they make up most of the game. It's the large-scale version of The Sims, except that it plays out like a vast open world. In other words, it's the biggest rehash of the RPG genre since Fallout 3." RPGFan: Review"...although each of them is a bit on the short side (fewer than 10 hours for most, if that). But, again, these are not stand-alone adventures, but part of a bigger world in the same way Skyrim is. For the right type of RPG fan, this is a lot of content for a good price. And, for those who may be put off by some of the artistic aspects, there are plenty of quest and dialog options to make things worthwhile even if you're not a fan of the whole fantasy-Arts-Deco-in-game-art-world." Atagames: Review"...however, the experience has a feeling of artificiality. There are no quests to work towards and certain sections are repetitive and easy. The UI system also frustrates me with its accessibility. For example, while it's possible to move directly from one location to another in the main world, not all locations are available as destinations and neither can you go back and forth between locations as easily as I'm used to with most RPG's. Finally, as someone who prefers a completely open world game, Skyrim's map can be a nuisance, even at close proximity to landmarks. An episodic quest-driven RPG, Skyrim has a strong story and a relatively detailed world. This game will appeal to most fans of The Elder Scrolls series, but, unless you're a fan of the vistas, you'll likely miss much of the appeal of the game..." PCWorld:"The charm of the world, the ability to change its shape at will, is enhanced by a

What's new in The Basilisk:

Sampler Nyanco Space - Special Soundtrack Sampler Nyanco Space starts a new season with a music compilation sampler of the last months. As the first single, the "Special Soundtrack Sampler" by La coco, has got the Rolling Stone award for the best song of the year, 2009. You can now participate in the Nyanco Sampler. Record your own remix of your favourite track. For a limited time a set of zeitgeistsport tracks will show up in the Nyanco skin and the two band shows. The rest of the music features tracks by the Lab5, :de:Over, NANAK and Tuross. Additional selected tracks appear in the Nyanco skins for this time. Nyanco Space - Special Soundtrack Sampler Na Da The calendar says it has almost one year to go since the official release of Nyanco Space. La coco and arnschwender started with this track. They are happy how it came out and are waiting for the result. The cover is interesting and fits nicely to the title of the song. The written text on top of the frame sows the keywords of the duo. Their work, their self-outsourcing, their book and their new love! Nyanco Space has been always more than the label of just one label. A circle to everyone who is involved in sound art and related processes. The recordings Nyanco Space have done so far are about 90% new free creations of the labels headcase, funny and fascinating. Almost all tracks have been made with the same process. Just a lot of hours of listening music and constructing fun. So having received the acceptance roll and being awarded with Rolling Stone's best album in the year 2009 is great news and a huge honour for Nyanco! The next to be released are some new records by big names such as La coco, Nilbog, Keyster, BAD KIMZ, Detonator, Joko Leot, Mit Kamenz and Stetz. Another summer the melturrn bring you the next sensation of Nyanco! Free for all? You can own Nyanco Space for yourself! And you can listen to it for free at www.nyancospace.de/as3.html. The CD Drive Skin will be released right when the album is finished. So get your digital copy now! Nyanco is more than labels. It
