

This is the first fully 3-D, story-driven videogame adventure inspired by the classic sci-fi. This interactive experience takes you on a remarkable journey to the depths of the planet, a fantastic land filled with underwater caves, deadly creatures and evil doers. Everything is in the way to arrive at the fullest happiness of the children. Already at a young age, children are already starting to become aware of things and their environment. They start to understand their thoughts and emotions. The child's brain is better developed and looks for ways to realize and reflect their environment, and the content of their mind. At the same time, children are guided by their parents and teachers in various ways. In most cases, the parents work too hard and do not have time to spend with their children. In such a situation, a psychologist will help them and help them find a balance. They will try to help their children find harmony in their lives. "If you are a boy or a girl, then you are both, and you can only be happy in terms of the joys of every moment, because those two are a huge pleasure for life." "I'm a boy, but I feel like a girl, and vice versa." "At age six, the main thing that kids want is to have a bright and stable family life." "I play hide-and-seek, and sometimes I play with other girls who are my friends." "In general, most children start to ask themselves if they are a boy or a girl and then realize that they are both." Problems arise when children can not accept this paradox and therefore seek different solutions to these problems. Psychologists can help us to deal with the paradox. It is necessary to attract the attention of children to the process of adopting gender. This process needs to give time to think and to give the subject to think. The child needs to see from the point of view of the other gender, to feel the same situation as the other gender. The opposite sex can help us to solve our problems. Help us to find solutions to our problems by encouraging one of the two genders. Psychologists will help us to find solutions to the paradox. A&E / Starz and The Weinstein Company present a futuristic thriller starring Jim Sturgess, Geraldine Chaplin, Charlie Cox and Alfred Molina in the co-production of The

This game comes to life in an attempt to provoke empathy, alarm, and understanding of the consequences of our violent actions. Mia has gone on a vacation from her home country of Japan to France - a place where she longed for and finally found peace. However, instead of returning to her newfound home, she suddenly finds herself in a cold and empty place, completely naked. A kidnapper has seized her, stripped her, and imprisoned her. Now Mia must learn to navigate through a series of logical yet puzzling situations - environments that reflect her complete denial - to try and find a way out. The kidnapper's tactics may seem like obvious traps, but understanding Mia's state of mind will reveal her memory. Find her memories and learn to solve her puzzles. FEATURES - Unique perspective - Our heroine finds herself in a white room, completely naked, with no information at all. She is helpless, she has to find a way out of the room, and regain her memories. - Puzzles - The kidnapper has blocked all exits of the place, yet there are solutions. Player can see shadows, reflections, and details. - The game contains some third-party assets (music, graphic,...) - Gameplay is designed to be different - The protagonist does not simply stand still to try to find answers to puzzles. She can walk through the levels, hiding in the shadows. - The first person perspective adds to immersion - Our heroine can run away or explore the level. - Puzzles arise from the environment - In many puzzles, the player must go through walls and think about the environment to find a solution. - Familiar characters - The heroine looks like any person, but she is cursed. She was found as a baby lying on a dirt, yet she has no memory of her parents or any other family. Mia has left her home, yet...
