You can use the command line to edit the ` .abspath ` file. Use the command.Q: Deploying IoT device that already created with Docker I have created docker image and pushed to Docker hub. I have published this docker image and created repo. I can login into my account and see the last\_sync property. Now, I have created a file into this repository to build the docker image and upload it to docker hub. I need to upload this docker image to my wireless access point. Any way that I can upload it using push command. I don't know how to do this. A: You are creating the image

---

locally, so you can use docker push to publish it to the Docker Hub. Q: How to convert XSD DateTime type to a full DateTime? I have XML that is being created by a third-party. The XML is storing a date/time. I am using XSD to convert that XML to a C# object. When I convert the XML to a C# object, the date/time is converted to a DateTime, and its Date member is null. The XML looks like this: 2011-11-15T00:00:00 In .NET 2.0 I would use this code to convert it to a DateTime: `XmlDateTime xdt = new XmlDateTime(xmlText); DateTime tempDateTime = xdt.Date;` In .NET 4.0, I am having issues converting from string to DateTime because it requires a value to be a DateTime. If I create a new DateTime
