The digital libraries will be made available to end-users with a downloadable version (Win/Mac and VST) of the Pro Tools Library on January 1, 2010. This change has the following implications: The free space on Pro Tools HD 11 must be reserved for the Pro Tools HD library downloads - This means you must not make additional free space on your hard drive available for any other use. Please keep in mind that Pro Tools HD libraries are downloaded before installing to keep from overwriting your existing Pro Tools HD libraries. Also, while the Pro Tools HD 11 download version of the libraries will be available for download to end-users, the Pro Tools HD libraries will not be available for download to end-users on the Apple App Store or the Mac App Store until the end of 2009. In addition, the Pro Tools HD libraries will not be available for download to end-users on the Apple App Store or the Mac App Store until January 1, 2010. If you are a Pro Tools HD licensed user and are missing your Pro Tools HD 11 libraries and would like to access them from your Pro Tools HD software, you can get them by downloading the Pro Tools HD 11 libraries using the Pro Tools HD 11 software, which can be found in the Pro Tools HD 11 software. Once the Pro Tools HD 11 libraries are downloaded, you should be able to open them directly with the Pro Tools HD 11 software. Once you have downloaded the Pro Tools HD 11 libraries, you can use the Pro Tools HD 11 software to download the Pro Tools HD libraries to your computer. Pro Tools HD libraries can also be installed in your library folders in both Mac and Windows versions of the Pro Tools HD software (you will need to download an installer from the Pro Tools website to do so). We are looking forward to offering these libraries and hope you will give them a try. Trollo! As of now, I have a full gigabit network and a very fast connection. But I am very much pleased with Trollo's performance! The install run fine and the first run as well. I have installed several plugins like VST from Softube (RMX), Reaktor etc. One thing which I am curious about is the VST-interface, which is not working. Maybe the media format of this VST-plugin is not compatible with my version of the Pro-Tools-10 (I am using 10).
