**Features Key:**

The game stores all game data on the SD/SDHC card, enabling you to enjoy your Nintendo DS playing 1, 2, and 3 in-game worlds.

When rotating the direction of your Nintendo DS, you can play different games. Effects such as rotation and seamlessness, which have been included in the DS version, are available in this game.

You can trade the special seal card between your Nintendo DS and this game. You can also trade special seal cards between the Nintendo DS and other games.

Play the regular version by entering "?version" from the game menu. When you enter the command from the game menu, you can choose to continue the game, play using sound only, or play using silent mode. The command "s (Sound mode) " and "s (Silent mode) " are also included in this game.

External memory support for the Nintendo DS game card feature has been added to this game. Since this game contains lots of game data that is not present in the Nintendo DS game cartridge, you can load this game using the game card and the player card feature.

You can play the best games by using 2 game cards. You can also trade game cards between Nintendo DS, Nintendo DS Lite, and Nintendo DSi game cards.
