Q: Read a file from extension I'm reading a Windows Mobile application file, in which the file is designed with.cs extension. I'm able to read the file but I'm not able to find the code from which I can read the file. Here's my code Assembly assembly = Assembly.LoadFile(@"C:\VB\MyProgram.exe"); Type type = assembly.GetType("MyProgram.MyAssemblyClass"); How to read the assembly code? A: How to find the assembly code? You'll need to investigate your application. You might for example start the process using Process.Start() and then examine the return values, or you can use the windbg debugger to disassemble it. Either way, you'll have to know the binary layout. You could also have a look at ILSpy. Mostly you won't find the assembly code directly in the assembly text file. It's included in the assembly in form of an assembly metadata, like the.pdb files. That's where you'd find it if you didn't know the file layout. Greek Cypriot leader Nicos Anastasiades and the Turkish Cypriot leader Mustafa Ak?nc? jointly opened a new crossing point on Tuesday, the first time in five years that the Büyükelkhane border station had been activated. Representatives of the two Cypriot leaders, along with Greek and Turkish Cypriot government officials, listened to the Turkish Cypriot and Greek Cypriot national anthems. Ak?nc? and Anastasiades also signed a protocol for the official opening of the crossing point, which takes its name after Çelikhan, the Greek island village where it was built. "This is a historic moment of its kind", Anastasiades said, adding that the opening of the crossing point was a "token of the reconciliation and the finalization of the Cyprus peace process". The opening of the new crossing point has been the result of years of negotiations, as Greek Cypriot and Turkish Cypriot forces have been unable to return to the hotly contested zone after the 1974 Turkish invasion. Though the two Greek Cypriot and Turkish Cypriot leaders announced a deal in July 2016, the two Cypriot groups have been unable to reach a final accord.
