Players now have a superior awareness of their run patterns from a motion capture suit that includes ten cameras, GPS, and high-performance computing, and FIFA 22's players can apply these movements to pass, dribble, and shoot when the ball is in the air. New Metrics Thanks to motion capture technology, FIFA 22 introduces new impactful player movement metrics for all versions of the game. In FUT, The Kicking Ace Factor is a measure of how accurate a player is at taking on-target free kicks from his preferred foot. In Ultimate Team, The Curl Factor captures the ability to curl a free kick with precision and accuracy - for the most accurate free kicks and chips, use your crosshairs to enhance your score. Our values-based technology that gives you feedback based on your performance on the pitch helps reward players that are most like real-life soccer stars. The FUT Team Call-Up System provides users with the ability to change their tactics from the run-up to the game, with even more freedom. And new match options in MyClub and Squad Management to unlock Player of the Month systems have also been implemented. Tactical Advices and Match Preparation FIFA Ultimate Team offers a new training mode: Squad Management. Create and manage your virtual squad over long-term on multiple game modes from anywhere you have internet access. Here, you can prepare strategies for upcoming real-life matches, as well as select to use any of three different formation preferences - playing 4-2-3-1, 4-3-3, or 4-5-1. The more videos you watch with the Tactical Tab and more information you collect on players, teams, and leagues with the Squad Overview, the more you can learn and fine-tune your formation choices. All three modes also offer feedback on player positions based on the amount of time you spent with them in training. Depending on their actions, players can train on the bench, in the central midfield area, or at their deepest position. Real-time events like goals and corner kicks will have a greater impact on your team and your players will respond faster than ever before. And with a new system that detects

the play style of individual opponents and adjusts your tactics accordingly, the game will challenge you from all sides and forces you to adapt and evolve your tactics. FIFA 22 is a free-to-play game available for Xbox One, PlayStation 4, and
