## **What's new:**

**Do you believe everything you hear about German military success on the battlefield? You can't, because the Great War II, as soldiers call it, was over long before you grew your first outrageously giant fingernail. Over in the East, the vaunted Wehrmacht was massing like an unstoppable force from all directions, and General Ferdinand Schörner, commander of the XXXIX Panzer Corps, was poised to take advantage of that. For decades, the Nazi propaganda machine has overstated the quality of Wehrmacht strategic forces. We're all the better for it. Any scholar, historian, or military-fiction author would be foolish to treat the regiments of Dr. Goebbels' mighty Second SS Panzer Army as more than an adornment of the enemy's line of battle. A Panzer Corps, in 1940, was actually little more than a voluntary collection of medium tank units swelled with staff personnel and logistics officers. The fanatical tactics of the Third Reich turned that superficial characterization on its head. The intensive blitzkrieg, the masked charges of storm troopers and shock troops onto fortified positions, the thrusting of reinforced wedges through the Allied lines, and the ruthless exploitation of every strategic advantage that could be snared from the Allies—these were war games played by men on both sides. The password was, "Hitler demands it!" and no hint of surrender was given. No such attitude pertained in the Soviet Union. Here, until the very end, the Wehrmacht operated under the rules of conventional warfare. Whereas the Third Reich, under the never-ending pressure of the ever-swelling Wehrmacht, would gradually degenerate into near chaos, the Soviet Union commanded far greater staying power. It stagnated for a time under the rule of a military-industrial oligarchy, but not for nearly as long as the Nazi regimes. The inability of the Wehrmacht to cast off its Führer's dictatorship... Yes, we know: propaganda! Who can forget German infantry divisions charged irresistibly toward the Russian guns, only to stumble over abandoned supplies and stalled vehicles? And then, just as the fighting was heavy, tanks and mobile artillery suddenly sprang into existence to drive the intruders back with great blows. That's right, nothing but pro-German propaganda! The commander of Sixth Army, Model, has the prerogative to lead his divisions forward—to join the reserves fighting with**
