The new motion capture technology is not only used to realistically animate the physical movements of players, it also intelligently expands and re-draws real-world actions and reactions using the latest cinematic motion capture techniques. Reactions and Changes "First of all, I want to say how proud I am of EA and all the amazing team who made FIFA so amazing," said Peter Moore. "We've created so much joy in the world of football, and our competitions have some of the biggest moments in the history of professional sports. The FIFA World Cup has been the biggest and best. Now, FIFA and EA SPORTS are joining forces on the pitch for the biggest game ever, which is FIFA 22." The FIFA World Cup is back for another 22-year celebration with FIFA 22. In this legendary competition, will the best teams in the world come out victorious? We're excited for FIFA 22 and the FIFA World Cup. This is the most robust, authentic football experience on your console and it's available in Fall 2019. FIFA 20 featured some of the most highly detailed, realistic players ever in a video game, but players' animations were also the most rigid, stiff and unnatural. For FIFA 22, we've made a major investment in technology, tools and gameplay systems to greatly enhance player responsiveness. With FIFA 22, you can expect the most immersive gameplay experience in any football game to date. We've made some of our most significant improvements in the areas of player responsiveness, animations, collision, ball physics and player intelligence. Making the Player Experience More Feel-Real Our team of game designers and developers have made a great stride in focusing on improving the experience of gameplay and making it more feel-real. Gameplay Players are more alive in their action. Their movements have become quicker and more responsive. The player feels as if he's still running in the game even when he runs. Opinion of game Players also change the game's opinion as they play. They develop a certain opinion as they play for a game to progress. And they feel more loyal to the game as they do so. Tackling and Interception Tackles and interceptions also become more consistent and more accurate. FIFA 22 feature stories We're bringing FIFA stories to
