I made Frogman Magma for the World of Kumis fans and for the people who love Frogman! I want to say that Kumis is a very special world and adventure for me! It is the first game where I used to download some assets, themes and music from the internet. The games I made so far are made by my imagination because I've never been a game programmer! I hope you enjoy my game! If you want to follow me and see more what I do in the future, you can follow me on Twitter: And me on Facebook: Thank you so much for watching and following my videos! If you like, please leave a like :) Today I pick 7 games that I'm REALLY really excited about, the main reason is probably that I love an adventure series and these games seem to be very promising in that area. Hope you enjoy this list! This is also the first time I make a segment for graphics and images without offering a related video. That is because I have no time or patience to do so. If you want to give my channel a like and share if you like what you see, and maybe even drop a subscription I'd appreciate that so if you can leave that in a comment as well.
