Automation. AutoCAD automation includes predefined functionality (called workflows) that has been created specifically to speed up tasks and enhance productivity. Many workflows are designed to automate drawing or layout tasks that are particularly time-consuming to complete. Some workflows are designed to correct a variety of technical issues, such as mirroring and matching. Raster and Vector. With a few exceptions, AutoCAD renders all drawing objects as vector, but every object can

have a raster appearance. The toolbars, menus, status bar, and tooltips also all come in vector and raster versions. This allows AutoCAD to easily display raster image formats, such as PDF and EPS, along with vector format, such as DXF and DWG. The raster appearance of all objects is, however, embedded in the DXF or DWG files, so raster objects in AutoCAD are not stored as raster images. Interoperability AutoCAD can export to many different file formats, including.DWG,.DXF,.DWG + DXF,.MDD,.PLT,.RST,.SCL,.XCL,.ECW,.TIF,.NET. AutoCAD's native file format, the Drawing Exchange Format (DXF), allows the importation of drawings from other software. Importing from other software, such as Quicken, CorelDRAW, and FreeHand, is also possible. However, the use of the older Metafile (.MDD) format is discouraged as it does not conform to modern file formats. Support for the Metafile format, at least for AutoCAD 2010 and later releases, was removed in AutoCAD 2014. Exports AutoCAD R14 and later export to PDF files. AutoCAD R14 and later export to XCL files. AutoCAD R14 and later export to.NET files. AutoCAD 2007 R14 and later export to.TIF images, using information in.PRJ,.CAD, or.DWG files. AutoCAD 2008 and later export to.NET files. AutoCAD 2009 R14 and later export to.DWG and.NET files. AutoCAD 2009 and later export to Microsoft Word 2007 (.docx) or.txt files. What's New In?

AutoCAD® 2019 added a new feature that allowed designers to import and edit a drawing on paper or on screen in the same step as the import. In AutoCAD 2020, you can also import the drawings and changes to the drawing from a file stored on your local computer. Markup Assist: Markup Assist is a simple, flexible way to show, edit, and compare changes to your drawings. You can view all changes to your drawings in a single diagram, see the changes that were made in all views, or compare the changes to the previous version (even if the previous version was not stored). Markup Assist is supported by AutoCAD LT, AutoCAD LT for Windows, and AutoCAD LT for Mac. File import or markup assist is available in most drawing views, including: Text and dimension views Geometry views Actions views Visual styles View properties Transactions and databases Raster and vector graphics Image Viewer Performance enhancements in the Business users Technology advancements in AutoCAD LT 2023 and AutoCAD LT 2020 for Windows Here are some new features in AutoCAD LT 2023 and AutoCAD LT 2020 for Windows: Point-in-time snapshots: AutoCAD LT now supports point-in-time snapshots. With point-in-time snapshots, you can create a snapshot of your drawing at a particular time and compare it to a later version. In your "History" tab, you'll find the "History List" and "History Snapshot" entries. The History List view allows you to view the latest drawings created on your computer. You can also create a point-in-time snapshot of your drawings. When you create a point-in-time snapshot, you can choose to either save the snapshot to your computer or to a file server. The point-in-time snapshot can then be imported and used as the base drawing for your latest drawing version. You can also use a point-in-time snapshot to compare a snapshot to a later time. Point-in-time snapshots are especially useful for tracking changes and redlining between versions of drawings. You can also use a point-in-time snapshot to create a snapshot of a particular drawing element, such as a named block
