## **PowerMill2017x6464bitProductkeydownload**

I was able to install Cabal and Autocad under my C:\Program  
Files\Adobe folder. Once that was done I was able to get the program

---

to run. I was also able to add the model as the working sheet but it will not go past the step of assigning the shading group which will allow you to change the location of the shading group. From what I can tell you have to have the shaders on the new item that was added to the model. Regardless the process was the learning process and helping me back on track. Q: How to get 3 2x3Slices (Buttons) with different background color? I can get a button with a 0x0 background image.

But I want to get multiple buttons with different background colors. This is what I got so far: ((Button) this.findViewById(R.id.action1)).setBackgroundResource(R.drawable.nicht\_in\_knopf); ((Button) this.findViewById(R.id.action2)).setBackgroundResource(R.drawable.nicht\_in\_knopf); ((Button) this.findViewById(R.id.action3)).setBackgroundResource(R.drawable.nicht\_in\_knopf); ((Button) this.findViewById(R.id.action4)).setBackgroundResource(R.drawable.nicht\_in\_knopf); By

setBackgroundResource I only got a button with a 0x0 background image. How can I do that the background is another image? Thanks! A:

Not sure if this answers your question but you could use a for loop:  
View[] buttons = {this.findViewById(R.id.action1),  
this.findViewById(R.id.action2), this.findViewById(R.id.action3),  
this.findViewById(R.id.action4), this.findViewById(R.id. 6d1f23a050
