Actually, the script in above is output of the commands such as conda install rlzmmail. so I want to remove this packages. But when I run conda remove -n conda-init rlzmmail. I got the error messages. And I noticed that there are a lot of this package. For example Installing package(s) : rlzmmail-0.1.0.tar.gz Installing package(s) : rlzmmail-0.1.0-cp36-cp36m-win_amd64.whl Installing package(s) : rlzmmail-0.1.0-cp36-cp36m-win_amd64.whl Installing package(s) : rlzmmail-0.1.0.tar.gz How can I remove all packages related to rlzmmail? And is it safe to remove all packages related to rlzmmail? A: Install it with the following command. conda install -n conda-init rlzmmail. That's it. The Power of Words It's a little known fact that over the millennia man has essentially harnessed the power of words. The reality is, there is no other way to communicate. Whether you are studying a language, or learning about another culture, it is through the power of words that we experience all else. We talk; we have no other way. If we were unable to use words, we would become completely non-verbal, and thus, foreign to others. Words have become a driver for global communication because, like it or not, we are all reliant on them. We are almost all capable of speaking and listening without much difficulty in our own language. We, however, often struggle with other people. Perhaps you are faced with the dreaded "how do you say…" question in a foreign country or within a community of any kind. Perhaps you simply don't know the language at all. We may resort to use of a dictionary, Google translate or even social media to aid us. But if you have ever found yourself standing in a predicament like the one above, you probably have an inkling of a better solution. To accurately communicate with another person, we must be
