shopping caneco bt 5.4 cancel n/a to over 8 years ago Hello, I have been looking for a program that will allow me to not only see what an order looks like to the customer, but to be able to place an order while on the customer's site. I have looked into many programs and have even been to Auto Dealer E-TV to see what is available. Unfortunately I still have not found anything that will do what I'm looking for. I have contacted the person that runs EDDIE, but have not received a reply as yet. If someone could point me in the direction of such a program, I would be most grateful. Thanks! 12 " Meshmixer.. When I got it I was very excited because I recently heard about FlexNet and how it revolutionized the work place in the auto industry, so I was thrilled to get it. Since it has been a couple of weeks since I downloaded it, I have been using the software and have really come to appreciate its power. I highly recommend the software to anyone who needs a database that can be set up so that it works for all of your customers. 18 " Meshmixer.. You are accessing this content, copyright is . .
