Right-click on the document's icon and select "Extract all".file extension with archive properties. "Create" a "Zip" archive with.rar's and.zip' s: In the "Folder options" tab,.Q: React useEffect useState, how to synchronize In my example code, I have two components: Parent: var [height,setHeight] = useState([100,100]); ... useEffect(() => { for (var i=0;i { const [key,setKey] = useState(0); ... },[]); the problem is: I have var [key,setKey] = useState(0) and it is working fine. but when I change the height of the parent, the component key is not updated synchronically, that is it can't update the state if useState is not called synchronically. Is it possible to update the state synchronically? A: In this case you don't need to use state at all. In your parent you do: const [height, setHeight] = useState(100); And in your child you do: const [height, setHeight] = useState(0); You can pass down the height to your child as props and it will always be the same. It doesn't matter if c6a93da74d
